NEW: BVS-O image processing system for automatic test bench OBSERVATION

SAME system as the well known BVS-R system only with deactivated crack analysis function

ADVANTAGES:

1. SAVE up to 33 % from the set price compared to the BVS-R system
2. All SW functions (except automatic crack detection) are available, like test bench triggered pictures, retrospective analysis, and more
3. HW readiness for BVS-R crack detection and upgrade via SW license possible

NEW features for the BVS-R system

- Shaker Cameras for the use on Shaker test benches
- Climate Cameras for the use in Climate Chambers
- MTB – multi test bench – **one for "all"** (up to 6 test benches)
- SW changes: e.g. Metric crack length measurement

OFFER

Please get in touch with us to discuss your test process and test bench requirements for higher automated 24/7 test runs.

Great Success & Best Regards
